

ELISA Wash Buffer, 10X

Description:

10X ELISA Wash Buffer is developed as a high performance washing solution for use in all ELISA formats. The optimized formulation of pH stabilizers, salts and detergents increases the efficiency of washing stages during ELISA, leading to a reduction in background noise and an increased specific signal.

The ELISA Wash Buffer (10X) must be diluted to 1X working solution with distilled water prior to ELISA wash procedures. e.g. Dilute one (1) part ELISA Wash Buffer (10X) to nineteen (9) parts distilled water.

For Orders:

Catalog Number	Product	Size
NB002408100	ELISA Wash Buffer, 10X	100 mL
NB002408500	ELISA Wash Buffer, 10X	500 mL
NB002408102	ELISA Wash Buffer, 10X	1 L
